Your Preferred Dental Partner

Thank you for choosing Nobel Biocare and one of our Preferred Dental Partners. Nobel Biocare maintains a worldwide network of leading dental professionals, who are committed to providing patients with the latest state-of-the-art restorative and esthetic dental solutions.

If you need assistance with your Nobel Biocare products, call your personal doctor using the details found in this booklet and on the reverse of your personalized patient card.

All products and solutions offered by Nobel Biocare maximize safety, reliability, performance and comfort for the benefit of you, the patient. Preferred Dental Partners in the Nobel Biocare network use implants and prosthetic solutions that have been thoroughly tested and found to comply with these rigorous scientific standards.

Care instructions

Standards of good oral hygiene are critical for the success and functionality of implants and restorations. Implants and restorations may fail as a result of poor hygiene maintenance and/or infections.

Oral hygiene examinations and regular dental check-ups are recommended every six months. However, for personalized and detailed care instructions, ask your personal doctor.

Innovation and science

Nobel Biocare is the world leader in innovative restorative and esthetic dental solutions, providing dental professionals with evidence-based, high quality root-to-tooth solutions. These include dental implants, crowns, bridges and laminates, guided surgery with diagnostics, accurate planning and precise treatment, scanners to biomaterials.

Nobel Biocare has a global presence in more than 70 countries and is headquartered in Switzerland.

Nobel Biocare's product leadership is proof of its heightened values of dental professional service and patient care.

Quality Commitment

In the interest of patients, all Nobel Biocare products and solutions have been thoroughly tested for clinical efficacy before being marketed. Nobel Biocare makes related data and tests available to the public, and recommends that implant patients choose only tested and proven products.

Naturally, the Nobel Biocare data and test results are only valid and meant for original Nobel Biocare products and solutions.

Nobel Biocare products and solutions are manufactured using modern technology for high precision production outputs that fulfil strict quality standards. All products are cleared for use by the U.S. Food and Drug Administration (FDA) and other regional and local health authorities.

Best-in-class materials

Your Nobel Biocare products and solutions are created from exceptional quality, highly biocompatible materials – developed and tested for long-term clinical performance.

Titanium

A specially created, commercially pure metal used in Nobel Biocare implants – also used as the base material in many dental prosthetics solutions, offering superior strength and durability.

Zirconia

A metal-free, ceramic compound used in dental prosthetics – offering excellent strength and esthetics.

Alumina

A special ceramic compound used in dental prosthetics that provides highly natural esthetics – often used in the most visible areas of your smile.
